

## **Close to see the End**

Our house is on fire and we only have one,  
Our creed has defeated our empty minds.  
We need to restore what's lost or nothing else we do will matter.

## Satellites

Satellites are flying over us and information  
Is fading in the skies and return like black rain.

They want to be the masters and I smell  
In the air something strange bitter and rotten.  
I predict a riot, I predict the end.  
There's no way back again and this is it my friend.

Satellites are flying over us and information  
Is fading in the skies and return like black rain.

Massive impulses collapsing my feelings streaming  
To nowhere and nobody listen.  
I think I'm not alone, the signals start to  
Weaken but the flame prevails.

I will never understand this.  
I will never understand this.

Satellites are flying over us and information  
Is fading in the skies and return like black rain  
Is fading in the skies and return like black rain

That we drink and take slavery... slavery

## Grey Path

Now close your eyes, now take a breath.  
One life, one chance, no turning back.

Loosing's not an option  
Loosing's not an option  
Loosing's not an option

Now chase your fears, don't shade a tear.  
One life, one chance, no time to act.

We want to fight against adversity,  
We need all the help that we can get to be strong.  
We want to fight against adversity,  
We lose all the time and we still talk about it.

Now close your eyes, now take a breath.  
One life, one chance, no turning back.

Loosing's not an option  
Loosing's not an option  
Loosing's not an option  
Loosing's not an option

Now close your eyes, now take a breath.  
One life, one chance, no turning back.

Loosing's not an option  
Loosing's not an option  
Loosing's not an option

## Miss Cow Jones

We are living a second life  
To explore beyond the maps and seas  
The defined lines are the only way to take.

I feel the wind calling to me pushing me to the edge,  
I think it's time to get ready for our plan.

Don't try to stop us now our masterplan starts.

Decipher all the codes, but you'll never understand our secrets  
Breathing and bleeding.  
Nobody understands why we are breathing and bleeding.  
Passion will keep us off our graves... off our graves.

Don't try to stop us now our masterplan starts.

Decipher all the codes, but you'll never understand our secrets  
Breathing and bleeding.  
Nobody understands why we are breathing and bleeding.  
Passion will keep us off our graves... off our graves.

We are living a second life  
To explore beyond the maps and seas  
The defined lines are the only way to take.

I feel the wind calling to me pushing me to the edge,  
I think it's time to get ready for our plan.

Every minute and every hour in every day,  
A lot of times they try to change your mind again  
Nobody is listening, nobody wants this bitter end

I've got a plan, I press the button  
There's no way out  
Don't try to stop us now our masterplan starts.

Decipher all the codes, but you'll never understand our secrets  
Breathing and bleeding.  
Nobody understands why we are breathing and bleeding.

Passion will keep us off our graves... off our graves.

Breathing and bleeding.

Breathing and bleeding.

Breathing and bleeding.

## Kindred Spirit

Let's celebrate the day when our lives became one.  
I never felt this joy until the day we met.

Since then the feelings, have been increased as we're living.  
I remember all the days we shared.  
Caring, respecting, walking to a better existence,  
I love every little thing you do.

Let's celebrate the day when our lives became one.  
I never felt this joy until the day we met.

Now that I know what's the truth,  
I want you to be with me instead I look in my heart,  
It tells me it's shorter than it should be,  
your warm hug is now my safe place,  
I want you to be with me.

Come here lay down and close your eyes,  
Just make a sound and I could be there for you.

Since then the feelings, have been increased as we're living.  
I remember all the days we shared.  
Caring, respecting, walking to a better existence,  
I love every little thing you do.

Let's celebrate the day when our lives became one.  
I never felt this joy until the day we met.

Come here, lay down and close your eyes,  
Just make a sound and I could be there for you.

I thought I saved, I saved your life...  
But instead you saved mine.  
I thought I saved, I saved your life...  
But instead you saved mine.  
My furry friend.

Let's celebrate the day when our lives became one.

## For the Fallen

Give me a reason to make a decision,  
No matter the path that we take.  
Give me a reason to make a decision,  
No matter the path that we take.

For all the fears of yesterday, your message will prevail.  
Your legacy is in every chord we play.  
No matter tomorrow 'cause all I want is to go on.  
Positive thoughts you whispered in my mind.  
In my heart.

The astral plane is teaching me  
The possibilities to change all of this.  
The astral plane is teaching me  
You have to be the one to find yourself.  
Sometimes life seems darker, than it really is.  
I'm thinking all the time 'bout the same things.  
No matter tomorrow cause all I want is to go on.  
Positive thoughts you whispered in my mind.  
In my heart.

The astral plane is teaching me  
The possibilities to change all of this.  
The astral plane is teaching me  
You have to be the one to find yourself.

No matter tomorrow 'cause all I want is to go on.

Give me a reason to make a decision  
no matter the path that we take.

Are you with me or against me?  
I try to keep the way you wrote and lead.  
Are you with me or against me?  
I try to keep the way you wrote and lead.

## Lines in The Sand

When I wake up in the morning  
With a smile painted on my face.  
Gathering forces to not kill you  
But I'm ready to burst your throne.

Selfappointed for your royal blood  
With a mantle full of lies and death.  
It's not a conspiracy, welcome to real life.

Taking the torch and taking control,  
Let's burn your lies 'till the day I die.  
I'm sure I'm not alone, the sum of strength  
Shows the real unity.

Coming home under the moonlight  
I know it's great to be my better self.  
In the meantime I was thinking,  
That everybody can see the hate.  
No retreating no surrender,  
Smash the man with the heavyweight sound.  
You're running out of time, I will disclose your lies.

Taking the torch and taking control,  
Let's burn your lies 'till the day I die.  
I'm sure I'm not alone,  
The sum of strength shows the real unity.

Taking the torch and taking control,  
Let's burn your lies 'till the day I die.  
I'm sure I'm not alone,  
The sum of strength shows the real unity.

When I wake up in the morning...  
When I wake up in the morning...  
When I wake up in the morning...  
When I wake up in the morning...

## Craving Love Pt. 1

It's not a measure of all the humanity,  
I'm sad to share love.  
I'm sick of the dramas.  
And all the griefs you create.  
Will there be a salvation?  
There will be a salvation

We lost our sense we lost our world

This is the prison of our own vitality,  
There's no way to share love  
Might be brain dead but my heart is still alive  
I don't wanna fall  
This is the end of the reality  
Of every feeling I won't ever forget  
Please don't tell me it's gonna end up like this  
There will be salvation  
There will be salvation

When you call my name,  
It disappear in the darkside.  
You don't have any way it disappear  
You're inside my heart!  
GO!

There will be a salvation.  
To try, to run, to runaway.  
Don't take me, don't take me.  
There will be a salvation.  
Don't take me, don't take me

## Craving Love Pt. 2

When the sun goes down  
And everything is impossible.  
When you need to fly away  
Between a virtual screen.

Conversations, life and sex  
The mirror reflects yourself.  
Don't look down take a step.  
Don't look down take a step.

There will be salvation.  
We lost our sense we lost our words.  
There will be salvation.

There's no way to say the truth, to say the truth  
Against what I wanna say, to what i say.  
It's just banality, banality,  
I don't wanna fall.  
GO!

## Summer is for Kids

When the sunlight started to change,  
It revealed reality.

Sometimes I think about the past,  
Sometimes I think about the past,

We need to protect what we are. What we are.

We are here and now to stand up with you.  
To smile, to put teeth in this ambition,  
in the end I have learned,  
That the summer is for kids.

When the sunlight started to change,  
It revealed reality.

Sometimes I think about the past,  
Sometimes I think about the past,

We need to protect what we are. What we are.

## Miles Away

If I could speak to my fifteen year-old self,  
I would tell him not to give up.  
Don't stop to catch all the pieces and notes  
and put'em all inside your heart.

Be yourself and don't forget,  
The voices inside your head.  
I think you got it.

Did you ever expect to get so far with your heart?  
Now you know the truth, get lost in the sound.  
Have faith in yourself, listen to your heart  
and never, never give up.

Be yourself and don't forget,  
The voices inside your head.  
I think you got it.

Be yourself and don't forget,  
The voices inside your head.  
I think you got it.
